Dear Friends:

As I write this on Easter morning, a beautiful sunny day here in Alamo, I can look out over the garden and see Snow Flurry and some of the other early varieties bursting into bloom, so I know the iris season will soon be upon us.

The Dwarfs have been putting on a very colorful show here for the past two weeks. They are the most winsome little fellows, and those of you who have not been bitten by the "Dwarf Bug" are really missing something, I assure you. We have more than doubled our listing this year, and will continue to list the newer and better Dwarfs as they become available.

Our Tall Bearded Iris have never looked better. We have added about one hundred new varieties to our listing this season, as well as the five new introductions originated by Mr. Williams and Mr. Robinson (page #4), which are all outstanding new iris.

As a member of the American Iris Society, I had the pleasure of attending the Convention at Hamilton, Ontario in Canada last year, where I had the pleasure of meeting so many of you fine people. With Convention time near at hand I am looking forward to seeing you all again and wish to extend an invitation to you to visit our gardens on your way to or from the Convention.

Once again it will be our pleasure to exhibit at the Spring Garden Show in Oakland, where we will have the opportunity to show TODAY'S MODERN IRIS to some 75,000 flower lovers. Those who are interested in iris are cordially invited to visit our garden at Alamo.

It is gratifying to see our files grow and grow, and to receive the many nice letters from our friends and customers. We sincerely appreciate your confidence in us and we shall continue to give each and every one of you our thoughtful and personal service.

HELEN and BILL DIEHL

## VISITOR'S WELCOME

Our gardens are conveniently located on the left side of Las Trampas Road at Alamo. Alamo is four miles south of Walnut Creek (if you are coming from San Francisco, Oakland or Berkeley) on the Danville Highway, State Route #21. If you are coming from the South, turn right at Dublin to reach Danville — then on two miles to Alamo.

We grow about 25,000 Tall Bearded Iris in a beautiful setting of walnut and pear trees, as well as about 5,000 Dwarfs. These perky little fellows, which average 4 inches to 10 inches in height, create a colorful showing during their blooming period, which is between March 20th and April 25th.

Our peak season of bloom for the Tall Bearded Iris is from around the 20th of April through the middle of May. We have on display nearly 500 varieties of the newest and best originations from all over the United States, Canada and England; and, at peak blooming season, the garden is a panorama of color.

Alamo is ONLY 20 MILES from OAKLAND or BERKELEY — a beautiful half-hour drive.

## 1956 IRIS INTRODUCTIONS

*Kensell Williams, Fairfield, California:*

● **CYCLAMEN ROSE** — ML. 36" \$15.00

A large, beautifully tailored bloom of smooth finish and heavy substance. The color is mid-way between Bengal Rose and Cyclamen Purple, a hue of great beauty and carrying power. The plants are floriferous, and bloom over a very long season, withstanding well all the weather extremes. Very broad of parts, and the geranium red beard is just the right touch. Well branched, tall, and sturdy, we think this is a "must" for any garden, and offers exciting possibilities for the hybridizer.

● **FROSTED CUPCAKE** — EM. 32" \$10.00

An enchanting novelty from pink breeding, this pert and saucy flower evokes considerable comment wherever seen. The standards are a soft Venetian Pink, overlaid with silver frost, while the falls, which flare way out and turn up at the tips, are satin-white, brushed Ochraceous Salmon at the hafts and lightly edged the color of the standards. Truly different, and makes a beautiful clump. Looks for all the world like a pink frosted cupcake on a white china saucer.

● **PINTO LASSIE** (Abbie Collet x Capitola) ML. 28" \$10.00

So amazingly different that it stops visitors in their tracks, this large flowered onco-bred is a true variegated iris. The broad blooms are splashed and veined light Dahlia-Purple over a soft cream-white ground, with broad bronze beard and brown dots stippling the haft. A novelty that seems to be taking the iris fanciers by storm. Advance orders leave a short supply. Typical onco branching.

*J. B. Robinson, Nashville, Tennessee:*

● **QUEEN ANNE** (Sdlg. x Chantilly) L. 32" \$15.00

A large, well branched flower of very heavy substance and smooth texture. The closed standards are a soft creamy-lavender, and the semi-flaring falls are a lustrous light lavender, with a yellow beard and light yellow shading on the haft. Both the standards and falls are beautifully ruffled and both have the lacy or crimped edges of Chantilly, only heavier. A finely formed flower of regal bearing, and a good parent both ways. A late bloomer that will prolong your iris season. Queen Anne was greatly admired at the 1955 Convention where it was shown under No. 162-51.

● **SUNSET GOLD** (Ola Kala x Cascade Splendor) M. 34" \$10.00

This vivid, deep yellow self with rich yellow beard, also drew much attention at the 1955 Convention where it was shown under No. 52-40. A large, well formed flower of heavy substance with closed standards and semi-flaring falls of exceptional width. An impressive iris of unusual landscape value. Sets seed and bears some pollen.

## TALL BEARDED

<b>ABIE COLLET</b> (K. Williams '55) M. 32"	\$7.50	
A very blue, pure self with slight intensification in falls. The truest deep blue that we have ever seen. The large, fluted, flaring blossoms, which are open three to four days, have extremely heavy substance, like crisp leather, and a glossy, slipper satin finish. The foliage is stiff and upright and the flowers are well spaced on beautifully balanced branches. It's outstanding floriferousness and rich coloring create a vivid effect in the border.		
<b>ADAIR</b> (Mitchell) M. 36"	\$1.00	
Crisp, slightly ruffled lavender-blue self with white beard. Delicate and airy in appearance, yet weather resistant.		
<b>AFTER MIDNIGHT</b> (Muhlestein '49) M. 36"	\$1.50	
Large, well formed flower of deep purple on tall stalk. Very effective combined with the pastels.		
<b>AL BORAK</b> (DeForest '52) ML. 36"	\$6.00	
Glowing golden brown with copper overlay. The extremely wide horizontal falls, heavy substance and distinct color of this huge flower make it one of the most impressive irises in this class. HM. '53.		
<b>ALDURA</b> (Larson '43) EM. 36"	\$1.00	
Blue and white plicata with fine form and very heavy substance.		
<b>ALLINE ROGERS</b> (Kleinsorge '50) EM. 34"	\$1.50	
Very large, flaring, heavily ruffled flower in a blend of pink, rose and gold, with golden yellow beard. HM. '51		
<b>AMANDINE</b> (Douglas '46) ML. 36"	\$1.00	
Clear lemon-cream self with broad domed standards and ruffled flaring falls. Weather resistant. Winner of President's Cup '48. HM. '46. AM. '48.		
<b>AMBER GEM</b> (Salbach '46) M. 36"	\$1.00	
Beautifully formed large blooms of soft rose, blended with golden amber. Effective with medium blues. H. M. '47.		
<b>AMERICAN MODERN</b> (Craig '51)	\$6.00	
Unusual, rich olive-ochre Mohr hybrid, flecked bluish-green. Falls heavily veined red.		
<b>AMULETTE</b> (Sass '53) M. 38"	\$2.00	
Rich chamois, overlaid with shades of rose, gold and blue. Large blooms with broad ruffled petals of semi-flaring form.		
<b>ANATOLIA</b> (Craig '49) M. 39"	\$3.00	
Light red-violet Mohr hybrid with signal patch at tip of beard. An attractive flower and a good grower.		
<b>ANNETTE</b> (Hall '55) M. 34"	\$10.00 NET	
A widely flaring deep rose flower with coppery overcast, accented by bright red beard.		
<b>APRICOT GLORY</b> (Muhlestein '51) M. 35"	\$4.00	
A smoothly finished apricot pink with deeper coloring on hafts and self colored beard. HM. '51.		
<b>APRICOT SUPREME</b> (Tomp. '51) M. 40"	\$3.00	
Deep apricot with brilliant full beard of apricot red. Large blooms with broad heavily substanced petals. HM. '51		
<b>ARABI PASHA</b> (G. Anley '53) ML. 36"	\$5.00	
New English introduction. Smoothly finished deep cornflower blue with blue tipped beard. Tailored form with semi-flaring falls. Dykes Medal Award in England '53		
<b>ARGUS PHEASANT</b> (DeForest '48) M. 38"	\$2.00	
Large golden brown self with brown beard, wide standards and broad flaring falls. AM. '50. Dykes Medal '52		
<b>AUBURN</b> (Klein. '45) E. 36"	\$1.00	
Vivid coppery henna-brown with brilliant blue patch at tip of beard. HM. '46		
<b>AUTUMN BROWN</b> (Lowry '53) M. 38"	\$10.00	
Glistening deep copper-brown blend with slightly ruffled wide flaring falls. Very heavy substance. HM. '52.		
<b>AUTUMN HUES</b> (Sass '51) M. 38"	\$15.00	
Large ruffled flower or rich antimony yellow flushed rose-pink and blue. Blue flash at tip of beard with brushing of orange at haft.		
<b>AZURE LAKE</b> (Muhlestein '52 EM. 36"	\$5.00	
Heavily ruffled medium blue with domed standards and flaring falls. The clear coloring and extreme ruffling draw much attention. HM. '54		
<b>BALLERINA</b> (Hall '51) M. '36"	\$3.00	
Large soft flamingo pink with broad heavily substanced petals and heavy orange beard. HM. '51. AM. '53

# DWARF IRIS

Great progress has been made in the breeding of dwarf iris, resulting in a wide range of beautiful new colors and dainty new forms. These tiny, charming and colorful little flowers are ideal in rock gardens, border plantings or inter-planted with other spring bulbs. Dwarf iris need very little care, requiring only a well drained sunny location.

## PLANTING INSTRUCTIONS

**PLANTING INSTRUCTIONS:** Iris rhizomes should be planted in a sunny, well drained location where they will have at least a half day of sunshine. The roots should be spread and planted deeply and the rhizome itself should be planted about one-half inch below the surface of the soil. The soil should be kept moist until the plant is well established. Iris grow well in any type of soil. However, the addition of humus to very heavy soil is desirable. Bone meal may be worked into the soil before planting or used as a side dressing once a year. Since iris multiply rapidly, planting should be spaced from 12 to 18 inches apart to allow for proper ventilation. Your rhizomes should be planted as soon as possible after you receive them. If impossible to plant at once, unpack and keep in a dry, cool place.

## HYBRIDIZERS' CHARTS

The importance of keeping good records has been stressed by all the successful hybridizers. In order to keep both accurate and permanent records on our own crosses we have compiled a hybridizer's chart, which we have found to be very satisfactory. This chart, which carries back for five generations, has spaces for the hybridizer's name, year of introduction, color of flower, color of beard, season of bloom, and notes on standards, falls, substance, stalk, etc. Additional notes may be kept on the reverse side of sheet. We are offering this chart in sets of 100 sheets —
